

DiDy Retreat

17/18 December 2018 – Münster

Monday, December 17

11:00 *Welcome coffee*

11:20 Robert Müller "HyASP – Hybrid Assembly of Plasmids"

12:00 Tizian Schulz "Efficient querying of a pan-genome"

12:40 *Lunch*

14:20 Karsten Willems "Spatial Image Similarity – a similarity metric for mass spectrometry imaging data"

15:00 Konstantinos Tzanakis "Large-scale storage, analysis and integration of metabolomics data"

15:40 *Break*

16:20 Lukas Pfannschmidt "FRI – feature relevance intervals for interactive data exploration"

17:00 Boas Pucker "The Niederzenz-1 genome sequence facilitates *Arabidopsis* genomics"

17:40 *Little dinner*

19:00 X-mas market

Tuesday, December 18

≥ 6:30 *Breakfast* (check-out before 12:00)

9:30 Olga Zolotareva "Identification of dysregulated gene modules in heterogeneous diseases"

10:10 Nicole Althermeler "Ancestral lines for multiple types"

10:50 *Break (and group photo)*

11:20 Jörn Kalinowski Invited talk: "Prospects and challenges of Nanopore sequencing"

12:20 *Lunch*

13:30 faculty: meeting / students: enjoy Münster
